

## Craft for Paul and Silas

**JAIL:** Use corrugated cardboard and cut out 3 pieces. The back piece should have 4 holes -- 2 on each side, I color coded them so the children would know which was the upside and which went with the right and left side of the jail. Put 2 punch holes to match with the holes on the back on both the left and right pieces.

Use long brads coming from the outside in, to hold them together. Make sure they run up and down or they will interfere with the bends. I put a small piece of Velcro on the door so when the earthquake happens the door can fly open and the jail falls over so Paul and Silas can get out. The lock is a little piece of yellow paper with sticky on the back. I also cut a small piece of cardboard to put the jail on so it wouldn't fall over until the earthquake.

**JAILER:** Glue two pop cycle sticks together one about 1/3 down the stick, put one piece of double stick tape on each arm. Cut out coat for jailer out of colored construction paper. Put two sticker eyes of any kind on top of stick and cut out a key and double stick tape it on one hand.

**Paul and Silas:** Two clothes pins, glue on wiggly eyes and draw a mouth, glue on a dot of yarn or draw on a little hair in two different colors. I found ribbon with sticky on one side so I just cut two pieces for each guy the length of the bottom of the clothes pins and pulled off the paper and stuck one on front and one on the back of Paul and Silas.
